PROFESSIONAL SUMMARY

Full Stack Developer with 1.7 years of experience building end-to-end web applications and microservices using Node.js, Nest.js, Kafka, RabbitMQ, React.js, Next.js, TypeScript, skilled in **designing and developing backend services and responsive frontends**, and deploying **high-performance, cloud-ready applications.**

TECHNICAL SKILLS

Frontend: React, Next.js, Tailwind CSS, Redux, React Query
Backend: Node.js, Express.js, Nest.js, TRPC, GraphQL, Kafka, RabbitMQ
Languages: TypeScript, JavaScript, Go
Databases: PostgreSQL, MongoDB, Redis
DevOps: Docker, Kubernetes, AWS, CI/CD
Testing & Tools: Vitest, Jest, Cypress, Git, GitHub

WORK EXPERIENCE

Software Developer **Aug 2024 – Present**
Practiskills Pvt Ltd. Remote

- **Designed and deployed microservices** using **Nest.js** and **RabbitMQ**, enabling **asynchronous processing** and **event-driven workflows**.
- Built responsive dashboards, landing pages, and reusable React components using **Next.js and Tailwind CSS**, **accelerating frontend delivery by 30%**.
- Integrated frontend with distributed backend services via REST and GraphQL APIs, improving **data reliability and user interactions**.
- Implemented **authentication flows, onboarding experiences, and payment integrations**, increasing **user activation and retention by 15%**.
- Diagnosed and resolved production issues while releasing new features, **reducing platform bugs by 25%**.

OPENSOURCE CONTRIBUTIONS

Opensource Contributor — Cal.com (PR #22715)

- Enhanced Cal.com API v2 with hidden event type support, extended endpoints and response models, added full end-to-end tests, and delivered a production-ready feature merged into main branch.

PROJECTS

Mergewise | Website | GitHub | Next.js, TypeScript, React.js, Node.js, PostgreSQL, RabbitMQ

- Developed an **AI-powered GitHub code reviewer** that automatically analyzes pull requests and provides feedback on **code quality, best practices, and bug detection**.
- Engineered a **microservices-based review pipeline handling concurrent repository events**, reducing manual review effort by **40%**.
- Integrated GitHub App and Webhook for **real-time repository monitoring and automated analysis**.

Wavely | Website | GitHub | Next.js, TypeScript, React.js, Node.js, PostgreSQL

- Built a platform that converts **natural language prompts into fully functional websites**, enabling **rapid prototyping with live previews**.
- Implemented **real-time prompt iteration and manual code editing**, improving user control over AI-generated output.
- Architected **multi-project AI workflows** and streamlined generation-to-deployment processes, enhancing team efficiency.

EDUCATION

BTech IT | GPA: 8.54 **2024**
Parul University Vadodara, Gujarat
